Why, When, and How To Take a Sexual Health History

Nicholas Van Wagoner, MD PhD, FACP
Associate Professor of Medicine
Disclosures

• Research Funding
  • Genocea Biosciences
  • Vical, Inc

• Consulting
  • Genocea Biosciences
Objectives

• Discuss the rationale for obtaining a good sexual history

• Identify the key components of the sexual history

• Understand how to approach the sexual history in diverse patient populations
Polling Question #1

The last time I saw my healthcare provider, I was asked questions related to my sexual history.

• Yes
• No
Polling Question #2

What was the primary focus of the sexual history?

A. Sexual Risk Taking
B. Desire
C. Satisfaction
D. Performance
E. Violence
F. Other
What is Sexual Health?

“. . . state of physical, emotional, mental and social well-being in relation to sexuality. It is not merely the absence of disease, dysfunction, or infirmity”

What is Sexual Health?

- Positive and respectful approach to sexuality and sexual relationships

- Possibility of having pleasurable and safe sexual experiences free of coercion, discrimination, and violence

- Sexual rights of all persons must be respected, protected, and fulfilled

Sexual Health Framework

- Sexual well-being
  - Physical
  - Emotional
  - Mental
  - Social
- Positive
- Respectful
- Pleasurable
- Safe
  - Disease
  - Coercion
  - Discrimination
- Fulfilling
Sexual Health: Beyond the Individual

Individual:
- Knowledge
- Experience
- Attitudes
- Physical Health
- Age
- Responsibility

Relationship:
- Sexual Partner(s)
- Peers
- Parents
- Family Structure

Community:
- Religion
- Social Networks
- Socioeconomics

Society:
- Cultural Values
- Gender Norms
- Gender Inequality
- National or State law
Sexual Health and Life Stage
The “Why”

Sex is an important aspect of human thought and behavior
# People have sex

The “Why”
Sexual Health, Happiness, and Pleasure

SEX IS LIKE PIZZA
When it’s good, it’s good and when it’s bad, it’s still pretty good!
The “Why”
Sex can result in physical and emotional morbidity and mortality.

36.7 million people are living with HIV globally.
30% don't know their status.

AVERT.org Source: UNAIDS Data 2017

The “Why”
Sex can result in physical and emotional morbidity and mortality

STDs in the United States

More than 2 million cases of the three nationally reported STDs – chlamydia, gonorrhea, and syphilis – were reported in the United States in 2016, the highest number ever.
The “Why”
Sex can result in physical and emotional morbidity and mortality

Number of Cases in 2016

<table>
<thead>
<tr>
<th>Condition</th>
<th>Number</th>

<td>628</td>
<td>16</td>
</tr>
</tbody>
</table>
The “Why”

Sex can result in physical and emotional morbidity and mortality

*STDs accelerating among men, particularly gay and bisexual men*

Men accounted for more than **89 percent** (24,724) of all primary and secondary syphilis cases in 2016.

Rates increased among men by **15 percent** – from 14 cases per 100,000 men in 2015 to 16 per 100,000 men in 2016.

Gay, bisexual and other men who have sex with men (MSM)* accounted for **81 percent** (16,155) of male cases where the sex of the sex partner is known in 2016 and over half of primary and secondary syphilis cases overall.

Sexual and gender identity disorders. 4th ed. 2000;493-538  
Frank et al.  Am Fam. Phys. 2008. 77 (5);
Sexual Disorders in Men

- Massachusetts Male Aging Study (MMAS)
  - 52% reported some degree of Erectile Dysfunction (ED)
    - Complete ED = 10%
    - Moderate ED = 25%
    - Minimal ED = 17%

- National Health and Social Life Survey (NHSLS)
  - Unable to maintain an erection = 10%
Causes of Sexual Disorders

• Cardiovascular Disease
  • “sentinel symptom”
• Neurogenic
• Endocrinologic
  • Diabetic
• Smoking
Medications and Sexual Dysfunction

- **Diuretics**
  - Thiazides
  - Spironolactone

- **Antihypertensives**
  - Calcium Channel Blockers
  - Methyldopa
  - Clonidine
  - Reserpine
  - Beta Blockers
  - Guanethedine

- **Cardiac/antihyperlipidemics**
  - Digoxin
  - Gemfibrozil
  - Clofibrate

- **Cytotoxic agents**
  - Cyclophosphamide
  - Methotrexate
  - Roferon-A

- **Anticholinergics**
  - Disopyramide

- **Antidepressants**
  - SSRIs
  - Tricyclics
  - Lithium
  - MAOI’s

- **Tranquilizers**
  - Butyrophenones
  - Phenothiazines

- **H2 Blockers**
  - Ranitidine
  - Cimetidine

- **Hormones**
  - Progesterone
  - Estrogen
  - GnRH agonists
  - 5α-Reductase inhibitors
  - Cyproterone acetate

- **Recreational**
  - Ethanol
  - Cocaine
  - Marijuana
Psychogenic causes of Sexual Dysfunction

- Performance anxiety
- Depression
- Relationship conflict
- Loss of attraction
- Sexual inhibition
- Conflicts over sexual orientation
- Sexual abuse in childhood
- Fear of pregnancy
- Fear of STI’s
The “Why”
Primary Prevention

Levels of Prevention Strategies

Primary
- Avoid development of a disease
- Remove Risk Factor

Secondary
- Early Detection Treatment
- Prevent Progression

Tertiary
- Reduce Complications of established disease

Education
Vaccination
Condoms
PrEP

Discuss the rationale for obtaining a good sexual history

Knowing is not enough; we must apply. Willing is not enough; we must do.

Johann Wolfgang Goethe

Bruce Lee
Identify the key components of the sexual history

Confidentiality → Communication → Context → Question → Close

French P, Int J STD AIDS 2007 Jan;18
Nausbaum et al. AAFP. 2002. 66;705
Components of a Sexual History

- Confidentiality
  - Physical Environment
    - Welcoming
    - Comfortable
    - Private
    - Display of confidentiality policy

- Interpersonal Environment
  - Professional
  - Matter of fact
  - Trusting
  - Nonjudgmental
  - Interruption
  - Observers
Communication

- Verbal
  - Vocabulary
    - Explicit vs Vague
    - Medical vs Slang
    - Child vs Adolescent vs Adult
    - Opportunity to educate
  - Comfort with words
    - Matter of Fact
    - Ease in use of sexually explicit terminology
  - Clarification
    - Tell me what that means to you?
  - Normalize behavior

Communication

- NonVerbal
  - Professional
  - Eye contact
  - Blushing
  - Sitting
  - Patient Dressed

Identify the key components of the sexual history

Confidentiality → Communication → Context → Question → Close

Environment
- Physical
- Interpersonal

Verbal + Nonverbal

French P, Int J STD AIDS 2007 Jan;18
Nausbaum et al. AAFP. 2002. 66;705
Context: Where and When

- In primary care
  - New patient visit
  - Development/Educational milestones
  - New health related conditions
    - School physical
    - Prior to gynecologic surgery
    - Menopause-related visit
    - Onset of Diabetes
    - Depression screening
  - When patient has a concern
    - May be a subtle complaint
- Sexual Health Clinic
- Fertility Clinic
Context:
Patients and Providers have their own beliefs and judgments about sexual behavior.

- Patient
- Healthcare Provider
- Individual
- Relationship
- Community
- Society
Context: Explain Why you’re asking

• “Sexual health is important to overall health, so I always ask patients about it. If it’s okay with you, I’ll ask you a few questions about sexual matters now.”
Identify the key components of the sexual history

1. Confidentiality
2. Communication
3. Context
4. Question
5. Close

Environment
- Physical
- Interpersonal

Verbal + Nonverbal

When
Where
How
Why

French P, Int J STD AIDS 2007 Jan;18
Nausbaum et al. AAFP. 2002. 66;705
Sexual History Questions

• Start with easy, less personal questions

• Open-ended versus “yes/no”

• Normalize behaviors

• Use gender neutral terminology

• Avoid loaded terms “unfaithful” or “promiscuous”
Sexual Health Screening

Screening for Sexual Health History

Have you been sexually involved with anyone in the past six months?

Yes

With men, women, or both?

Yes

What sexual concerns do you (or your partner[s]) have?

No

Have you ever been sexually involved with anyone?

No

If you were sexually active, do you imagine it would be with men, women, or both?

What are your concerns or questions about sex?
The 5 P’s for Sexual Behavior History Taking

### Partners
- “Do you have sex with men, women, or both?”
- “In the past 3 months, how many partners have you had sex with?”
- “Is it possible that any of your sex partners have had sex with someone else while they were still in a sexual relationship with you?”

### Practices
- "To understand your risks for STDs, I need to understand the kind of sex you have“
- "Have you had vaginal sex, meaning 'penis in vagina sex'?" "Do you use condoms: never, sometimes, or always?"
- "Have you had anal sex, meaning 'penis in rectum/anus sex'?" "Do you use condoms: never, sometimes, or always?“
- "Have you had oral sex, meaning 'mouth on penis/vagina'?"

### Prevention of Pregnancy
- "What are you doing to prevent pregnancy?"

### Protection From STI
- "What do you do to protect yourself from STDs and HIV?"

### Past History of STI
- "Have you ever had an STD?"
- “Have any of your partners had an STD?”

Do you have any concerns about your sexual function?

- Patient’s perception of the problem
- Timeline
- Context (quality of relationship, stressor)
- Current health problems potentially affecting sexual function
- Components of the sexual response
  - Desire
  - Arousal
  - Orgasm
  - Pain
Essential Questions to Include in a Sexual Function Assessment

- How does the patient see or describe the problem?
- How long has the problem been present?
- Was the onset sudden or gradual?
- Is the problem specific to a situation or partner or is it generalized?
- Were there likely precipitating events?
- Are there problems in the patient’s primary sexual relationship (or any relationship in which the sexual problem is occurring)?
- Are there current life stressor that might be contributing to the sexual problems, and if so, how is stress perceived and managed?
- Is there some underlying guilt, depression, or anger that is not being directly acknowledged?
- Are there physical problems, such as pain?
- Are there problems with desire, arousal, or orgasm, and can the patient determine the primary problem?
- Is there a history of physical, emotional, or sexual abuse that may be contributing?
- Does the partner have any sexual problems?
Close

Nausbaum et al. AAFP. 2002. 66;705
Understand how to approach the sexual history in diverse patient populations
Fallon: (pronouns he, him his)

- Fallon is a 21 year old Trans-Male on hormone affirming therapy. He presents for a routine follow up visit. He has no health concerns today. It has been 6 months since you last saw Fallon. At his last visit, he reported no history of sex but at that visit, he had mentioned an interest in becoming sexually active.

- How do you have a sexual health conversation in a patient-centered, respectful way that allows you to optimally care for Fallon?
Sexual Health and the Sexual History

• Sexual Health history is an important part of a medical history and physical exam for all patients regardless of gender identify or sexual orientation.

• Important factors to consider
  • Heterogeneity of sexual identities
  • Devise sexual partnerships & practices
  • Sensitivity to language
Sex
• Refers to the presence of specific anatomy. Also may be referred to as ‘Assigned Sex at Birth’

Gender Identity
• What your internal sense tells you your gender is

Sexual Orientation
• Whom you are physically and emotionally attracted to
• Whom you have sex with
• How you identify your sexuality

Gender Expression
• How you present your gender to society through clothing, mannerisms, etc.

Sexual Orientation
• Whom you are physically and emotionally attracted to
• Whom you have sex with
• How you identify your sexuality

Gender Expression
• How you present your gender to society through clothing, mannerisms, etc.
Discussions about sexual health require trust

- Effective use of listening and mirroring
- Acknowledge previous healthcare experiences with respect and advocacy
- Help regulate and pace disclosure and exploration of sexual history

"Doctor, I'm not sure I can trust you."
The Discussion

The CDC’s 5 “P”s

</table>

*if yes, check-in before performing a pelvic exam*
Case 2

- Claire Johnson is a 53 year old woman who divorced 1 year ago after 25 years of marriage. She presents for her annual check up. How do you approach the sexual health history?
Case 2

• Starting the conversation
  • “Sexual health is important to overall health, so I always ask patients about it. If it’s okay with you, I’ll ask you a few questions about sexual matters now.”
  
  • ”In the past year, have you dated anyone or entered any new relationships?” If no, “Why not?”
  
  • “After ending a long-term relationship, it is very common for someone to have concerns about entering new sexual relationships. Is there anything that concerns you about starting a new sexual relationship?”
Case 3

• Julia is a 24 year old cis-woman who reports sex with both male and female partners. For the last 6 months, she has had a consistent female sex partner. You ask if she has any concerns about her sexual health. She says, “No, the sex is great! Plus, I don’t have to worry about getting anything with another woman.”

• Is she right?
Lesbian, Bisexual, and Other Women Who Have Sex With Women

- Lesbian youth are \( \frac{1}{2} \) as likely to have used condoms during their most recent sex.

- Young women who identify as lesbian, bisexual, or unsure are more likely to report multiple sex partners, drug use, pregnancy, STI and coercion into sexual contact.

Knight and Jarrett. AAFP. 95: 315
Lesbian, Bisexual, and Other Women Who Have Sex With Women

- STI Happen (risk varies by specific STI and sexual practice)
  - Bacterial Vaginosis
  - Genital warts/HPV
  - HSV-2
  - HIV
  - Bacterial STI
- Screening doesn’t happen as much

Knight and Jarrett. AAFP. 95: 315
2015 CDC STD Treatment Guidelines
Social and Sexual Health Questions for Women Who Have Sex with Women

Questions to ask after assuring the patient about confidentiality:
Are you having or have you ever had sex with women, men, or both?
In the past year, how many persons have you had sex with?
Does your current partner (or do your current partners) have sex with someone other than you?
Have you ever been pregnant? If so, how many times?
How many living biologic children do you have? Any miscarriages or abortions?
Do you have oral sex? Vaginal sex? Anal sex? Other types of sex?
Do you use barrier protection such as condoms, gloves, or dental dams?
Are there times you do not use barrier protection?
Do you use another method of birth control? (if sexually active with men)
Do you (or does your partner) have any plans to conceive in the next 12 months?
Have you ever had a sexually transmitted infection?
Do you ever have sex with strangers or people you do not know well?
Do you have a support system, including family and close friends?
Do you have any concerns about your sexual practices that I have not asked about?
Does your partner:
Physically hurt you?
Insult or talk down to you fairly often?
Threaten you with harm?
Scream or curse at you fairly often?
In Summary

• Discuss the rationale for obtaining a good sexual history

• Identify the key components of the sexual history

• Understand how to approach the sexual history in diverse patient populations
