What is health?

“Health is a state of complete physical, social and mental well-being, and not merely the absence of disease or infirmity.”

World Health Organization 1948

# Public Health

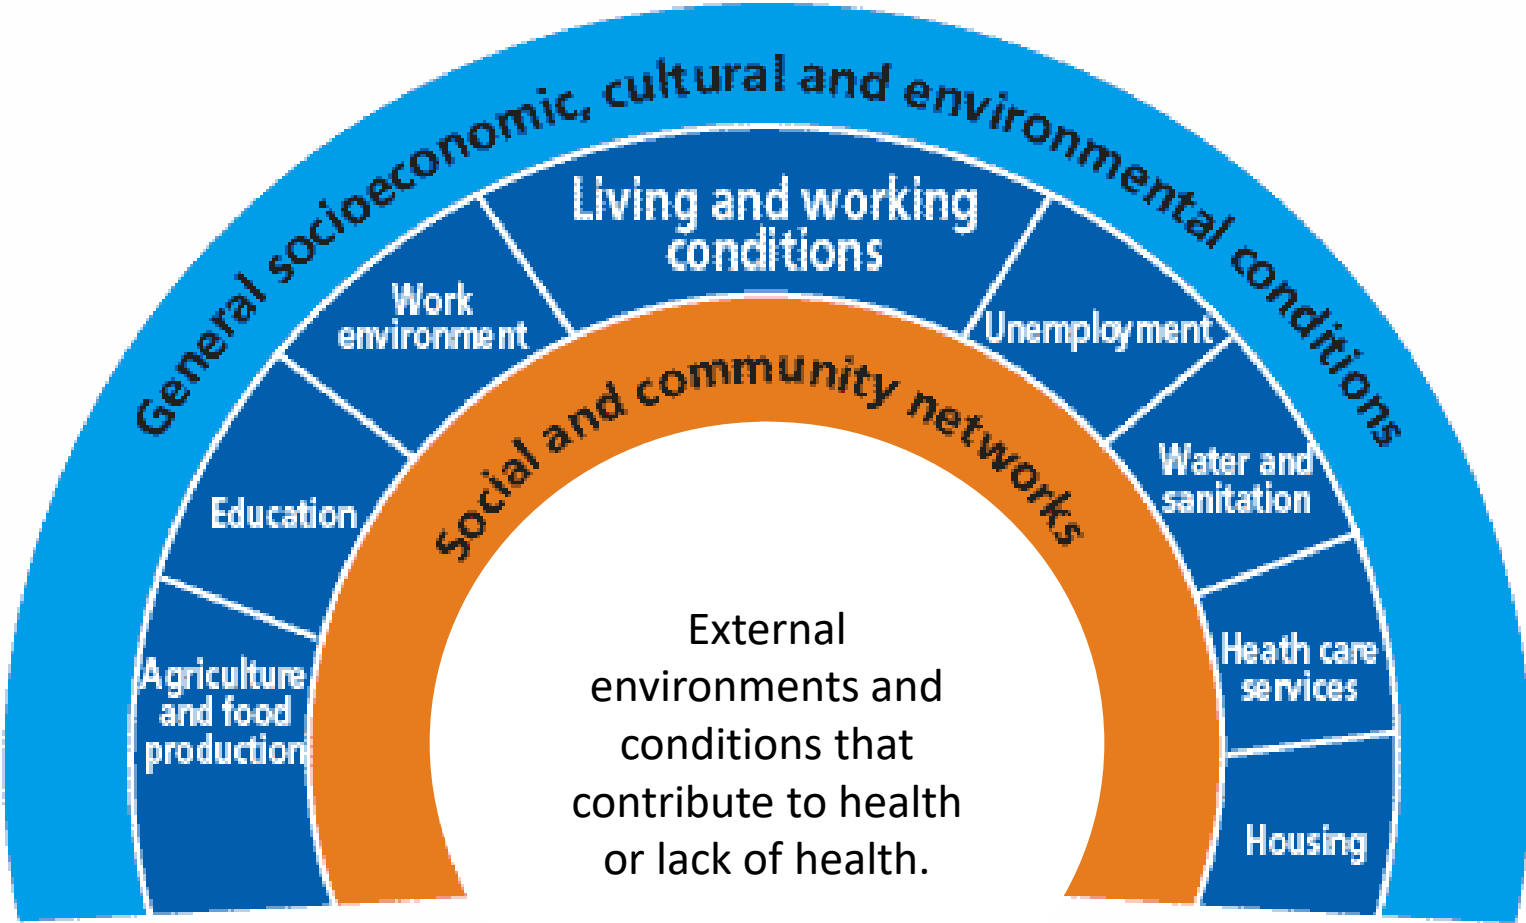

“Public health is what we, as a society, do collectively to assure the conditions in which (all) people can be healthy.”

Institute of Medicine (1988), Future of Public Health

# Factors that determine health

# Social Determinants of Health

# Health Equity

Attainment of the highest level of health possible for all people. Achieving health equity requires valuing everyone with focused and ongoing societal efforts to address avoidable inequalities, historical and contemporary injustices, and the elimination of health disparities and health care disparities

# Health Inequity

**Health Inequity**—Differences in health status between more and less socially and economically advantaged groups, caused by *systematic* differences in social conditions and processes that effectively determine health. Health inequities are *avoidable*, *unjust*, and therefore *actionable*.

# Disparities, Inequality, and Inequity

- *DISPARITY* = *INEQUALITY* and implies differences between individuals or population groups (UN-equal)
- *INEQUITY* refers to differences which are unnecessary and avoidable but, in addition, are also considered unfair and unjust
- [https://www.youtube.com/watch?v=vX\\_Vzl-r8NY&feature=youtu.be](https://www.youtube.com/watch?v=vX_Vzl-r8NY&feature=youtu.be)  
(4:09)

# Health disparity

A *population-specific* difference in the presence of disease, health outcomes, or access to health care – could be people over 70 die more often than people under 10 years old.

Health INEQUITY - differences which are UNFAIR, UNJUST and AVOIDABLE

An example:

Hispanic teenage girls are six times more likely to have a baby as white teenage girls.

# Health equity

*Assurance of the condition for optimal health for all people.*

*Dr. Camara Jones*

*Working together to advance health equity will eliminate health inequities that are unfair, unjust and avoidable!*

*So, what **extra** resources and supports do our Hispanic teenage girls need to avoid having a baby?*

# Working with Our HEART

CULTIVATING **SYMPATHY**

CULTIVATING **ADMIRATION**

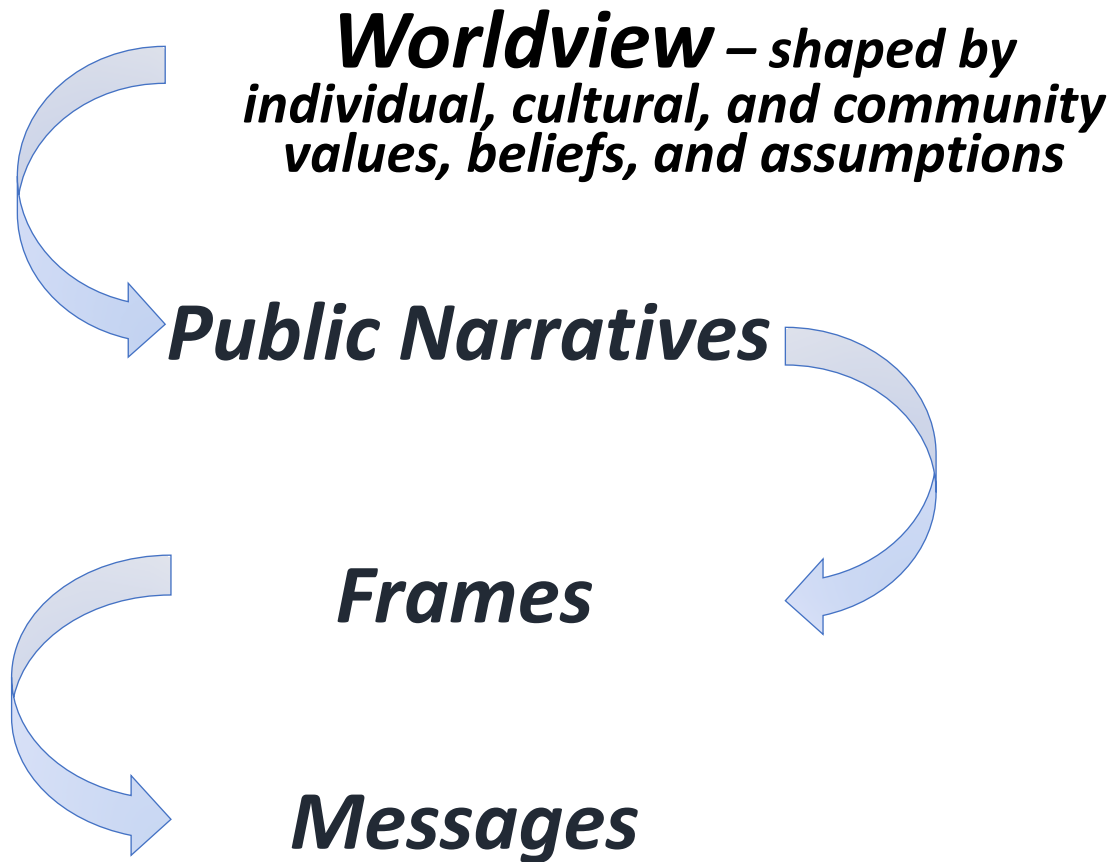

CONNECTING TO ONE ANOTHER – EXPANDING OUR INNER CIRCLES  
CROSSING TOWN AND COUNTY LINES – PUTTING OURSELVES IN PLACES THAT  
WE DON'T NORMALLY GO – BEING OPEN TO FRIENDSHIP – RECOGNIZING  
SAMENESS

# Advancing Health Equity: Achieving Optimal Health for All

- Expand the understanding about what creates health
- Strengthen community capacity to create their own healthy future
- Promote a Health in All Policies approach with health equity as the goal

# Expand the understanding about what creates health

# Structural inequities

- Structures or systems of society — such as finance, housing, transportation, education, social opportunities, etc. — that are structured in such a way that they benefit one population unfairly (whether intended or not).

# Health equity and structural racism:

- Structural racism is the normalization of an array of dynamics — historical, cultural, institutional and interpersonal — that routinely advantage white people while producing cumulative and chronic adverse outcomes for people of color and American Indians.

## Start with a broad definition of health

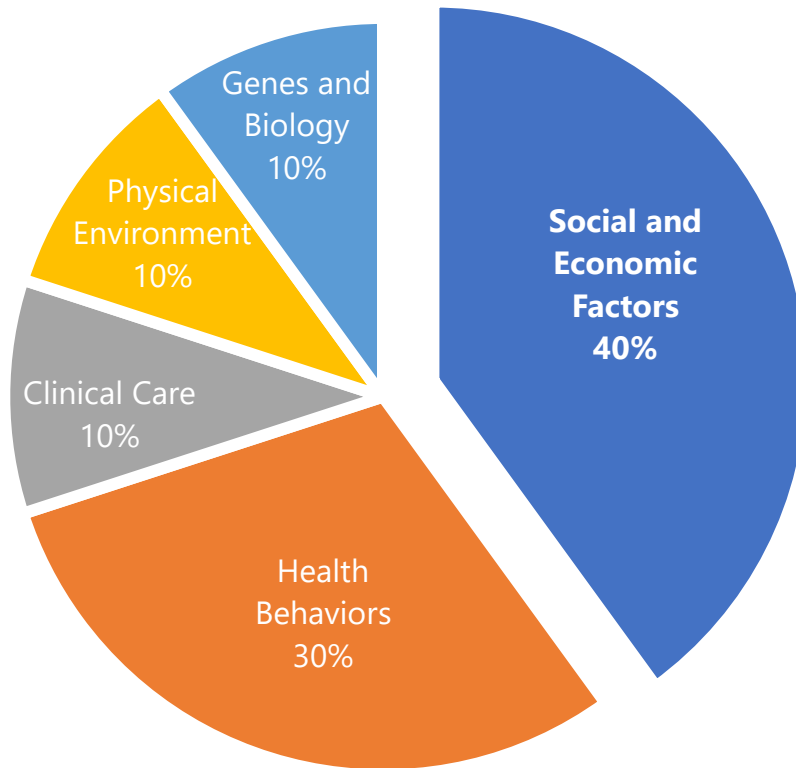

- *"Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity."* WHO 1948
- *"Health is a resource for everyday life, not the objective of living."*

Ottawa Charter for Health 1986

# Consider What Creates Health

## Determinants of Health

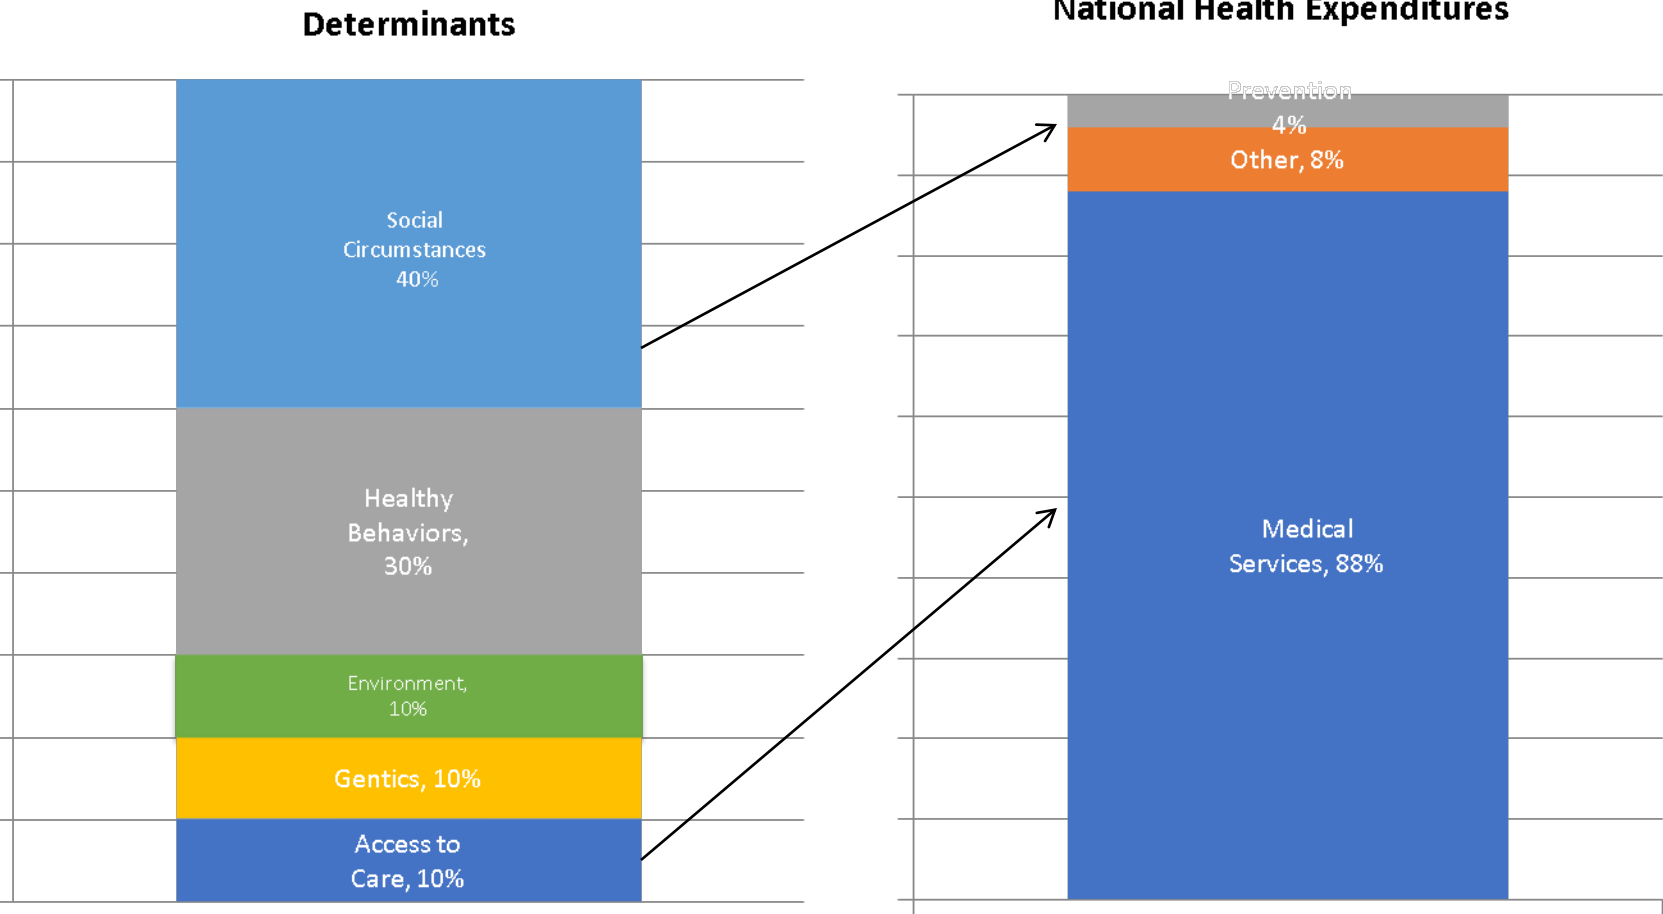

## • Necessary conditions for health (WHO)

- ☀ Peace
- ☀ Shelter
- ☀ Education
- ☀ Food
- ☀ Income
- ☀ Stable eco-system
- ☀ Sustainable resources
- ☀ **Mobility**
- ☀ Social justice and equity

Determinants of Health Model based on frameworks developed by: Tarlov AR. *Ann N Y Acad Sci* 1999; 896: 281-93; and Kindig D, Asada Y, Booske B. *JAMA* 2008; 299(17): 2081-2083.

# The Real Narrative About What Creates Health Inequities

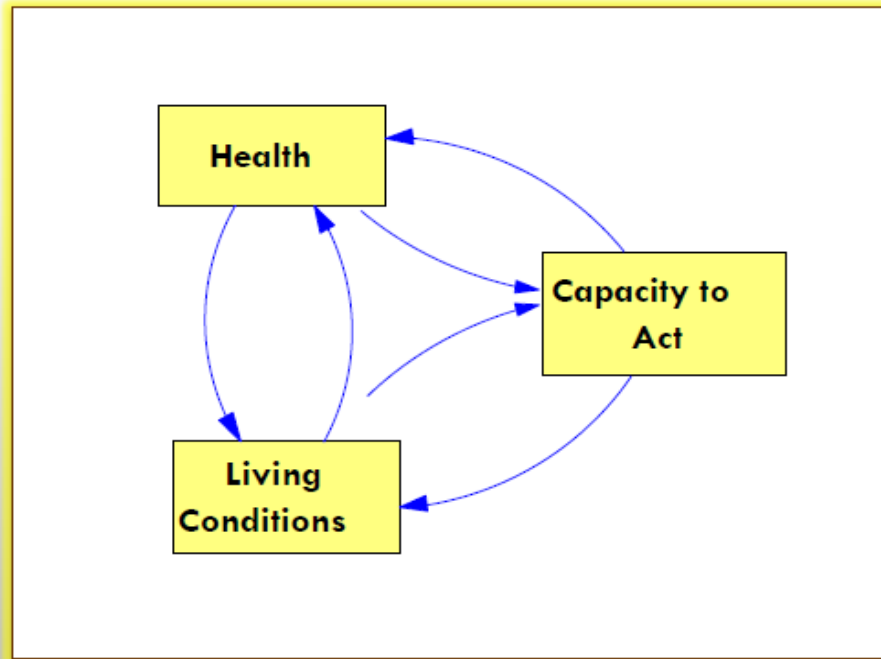

- Disparities are not just because of lack of access to health care or to poor individual choices.
- Disparities are mostly the result of policy decisions that systematically disadvantage some populations over others.
  - Especially, populations of color and American Indians, GLBT, and low income
  - Structural Racism

Strengthen community capacity to create their own healthy future

Health is not determined solely by medical care and personal choices but mostly by living conditions.

# Improving Living Conditions and Health: Organize the Capacity to Act

- Narrative:
  - Align the narrative to build public understanding and public will.
- People:
  - Directly impact decision makers, develop relationships, align interests.
- Resources:
  - Identify/shift the resources- infrastructure-the way systems and processes are structured.

# What is Structural Inequity?

- Systematic or Structural elements of society that benefit one population unfairly.
  - Finance
  - Housing
  - Transportation
  - Education
  - Social Opportunities
  - ETC...

# Structural Inequity

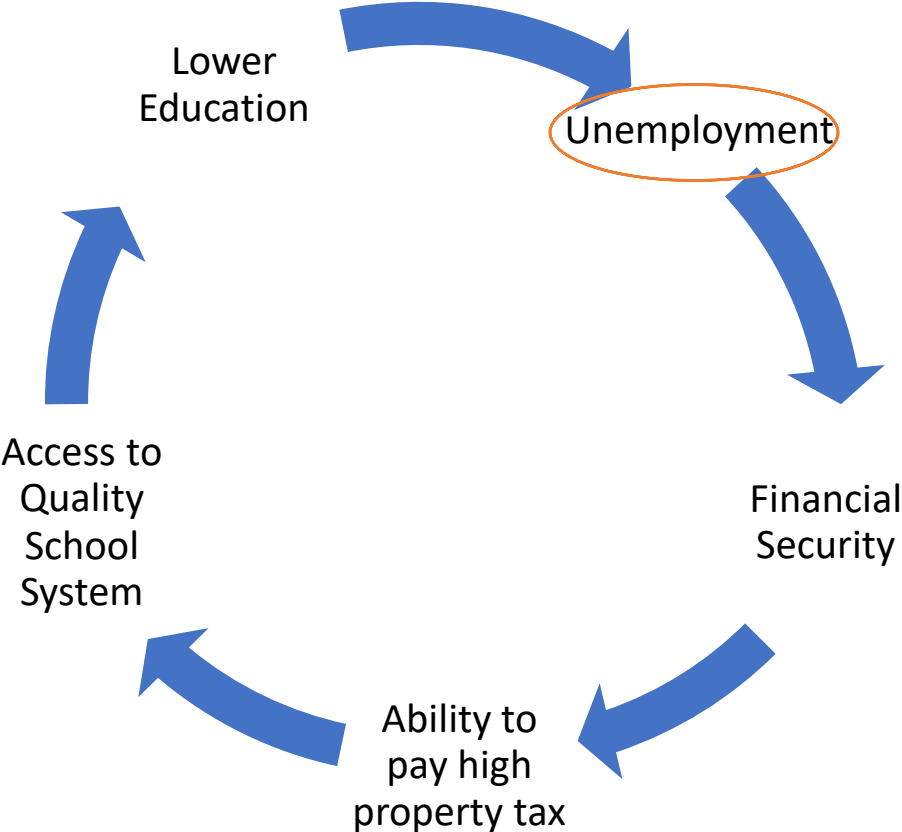

# Structural Inequity

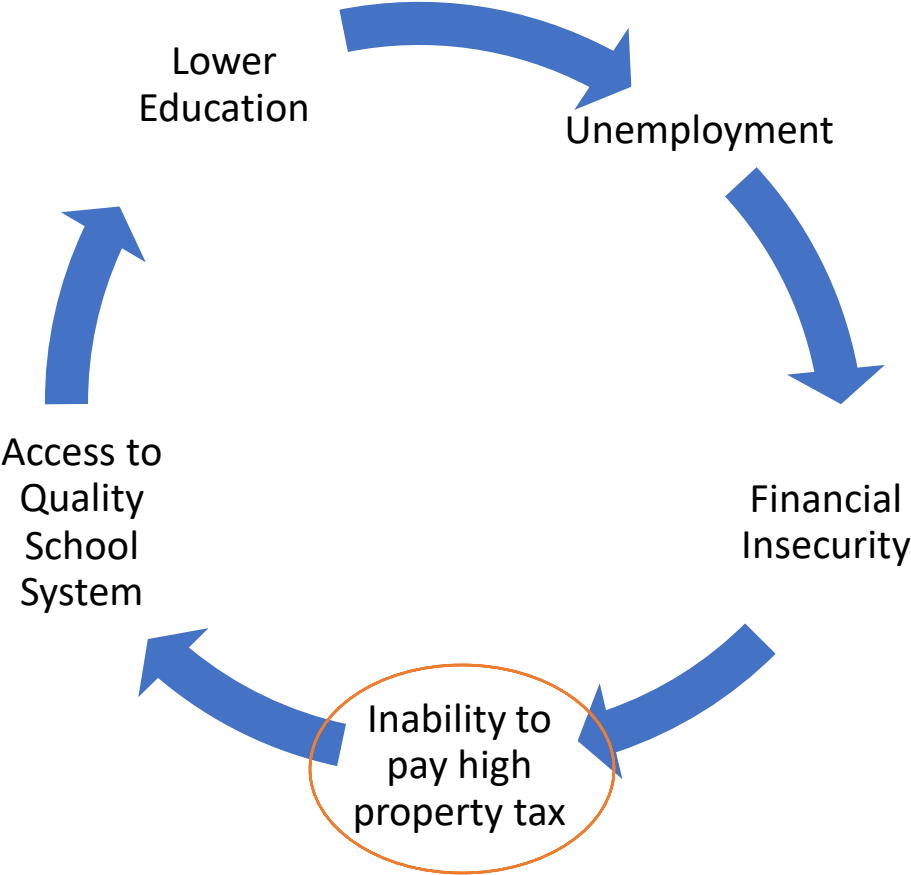

# Structural Inequity

# Structural Inequity

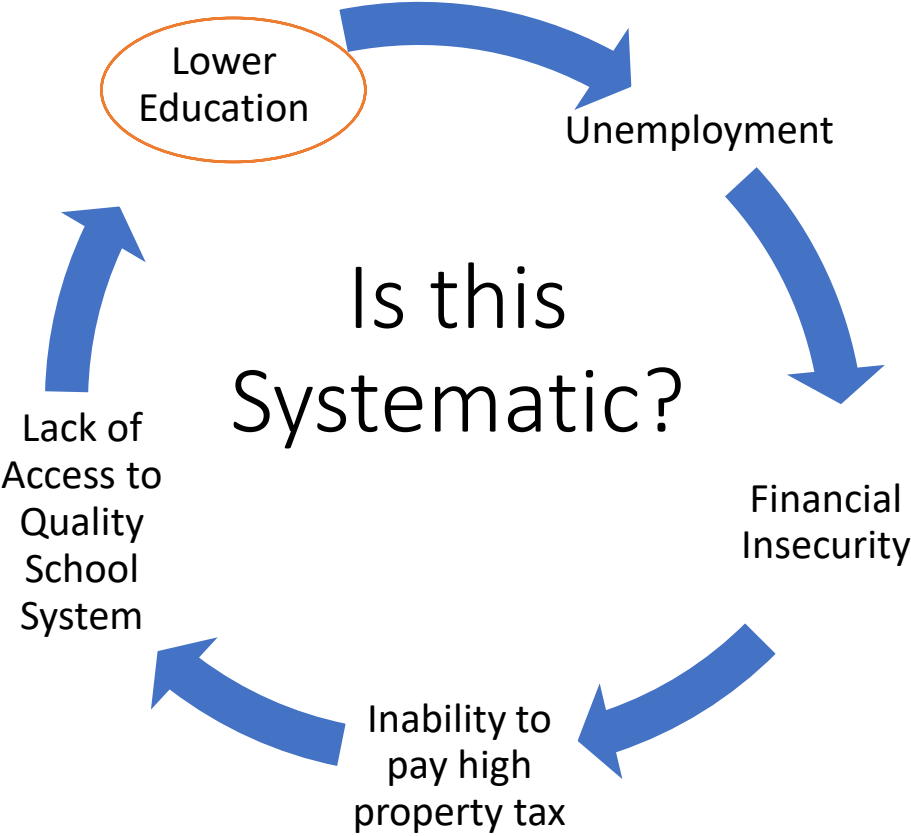

# Structural Inequity

# Structural Inequity

# Structural Inequity

# Everyone needs:

- Access to economic and educational opportunities (*high school graduation, access to jobs, transportation, etc.*)...
- The capacity to make decisions and effect change for ourselves, our families and our communities (*empowerment of women, community self-governance, opportunities for civic participation, etc.*)...

## Everyone needs (cont'd)...

- Social and environmental safety in the places we live, learn, work, worship and play (*housing conditions, crime rates, school climate, social norms and attitudes, etc.*) and
- Culturally-competent and appropriate services when the need arises (*access to health care, mental health care, financial assistance, etc.*)

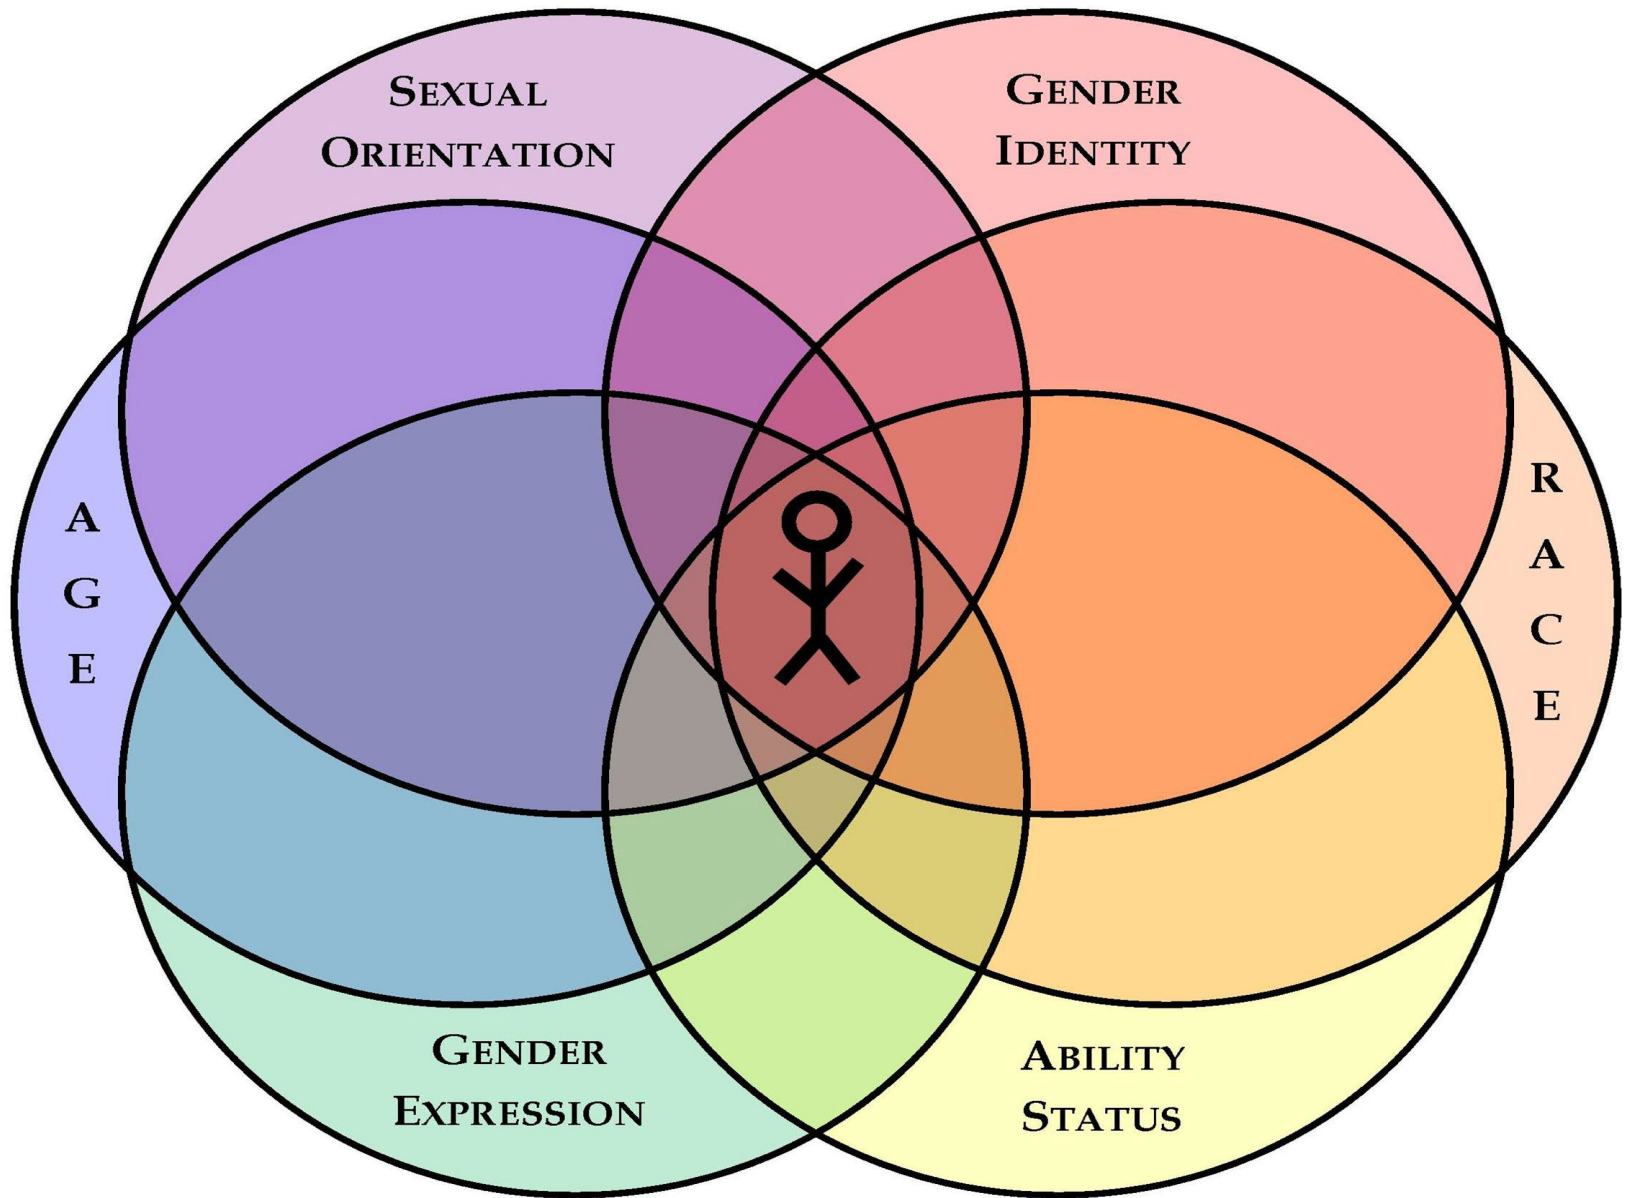

# What needs to be done

- Achieving health equity and eliminating health disparities requires valuing everyone and making intentional, consistent efforts to address avoidable systematic inequalities, historical and contemporary injustices.

## To create change

- *Public understanding* – of what creates health
- *Public agenda* – create expectation that we can and will address these conditions
- *Public/political will* – to make tough choices-  
accountability for policies, programs
